niu, or Hupture.

Dr. AMOS G HULL, having witnessed, during twenty five years practice in Surgery, the distress and misery attending the disease of Rupture, and the fatal consequences frequently includes to it, and being conquently incident to it, and being convinced that the unhappy effects were generally the result of badly con structed Trusses or the neglect to use any, was prompted from feelings of professional duty, and an anxious de-sire to witness a more effectual remedy, to devote a share of his time to dy, to devote a share of his time to the construction of an instrument for that purpose. He is now satisfied that he has brought into succ s-ful operation a Truss, constructed on a new principle and adapted to all cases of Rupture in both sexes; always, with the properties of the fulfilling the indiout an exception, fulfilling the indi-cation of confining or keeping up the bowel, and often, especially in young persons and recent cases, effecting a permanent cure.
Let it be observed that the pad of

this truss, instead of being convex like that of all other Trusses, is slightly concave, like the open palm of the hand. This pad being placed over the rupture and the spring of the truss exerting its power upon the centre of it, the strong pressure is made runture opening and a diminished pressure by its centre. It thereby not only prevents the escape of but approximates, and often unites the ruptured part so as to effect a radical cure of the complaint.

The following testimonials in its fa vour, are submitted to the public. Extract from the second edition of "Thatcher's Modern Practice of Physic," Boston 1826.

"A great variety of Trusses, form different principles, have beer from time to time, introduced to put lis notice; but with one exception is may be asserted, that they have been found ... alto rether "defigent in those ments ought to be formed It is within a few years that a Truss has beer invented by Dr. A G. Hull, a respec table Physician and Surgeon of New York, and late President of the Onei d. Medical Society, which is incomparably superior in its principles and properties to any of those previously in use. Dr. Hall is exclusively entitied to the credit of first adapting the true surgical principle for the radical ed the idea that the pad of the Truss the ring or aperture as much as pos-sible, in the state in which they are maintained in perfect health. Unlesthis he attained the parts can never recover their natural tone, whatever may be the degree of pressure appli

Valentine Mott. M. D. Professor o. Surgery in the University of New York decrees:

"The great and signal benefit which are produced by this Truss result from its strict subservance to, and accordance with Scientific and Surgical principles. Its mechanics adaptation to the parts, the simplicity of its construction the limited motion griduated by experiment, to the different attitudes of the body and to the action of the muscles; the permanency of its location on the bo-dy, and its pressure on the circum qualities, the tendency of which is to litimately to accomplish a cure of the

The operation and effects of the Truss is therefore directly the reverse of all Trusses heretofore in use which being convex tended to enlarge the dimensions of the rupture open 'I have adopted it in my own practice to the exclusion of all others and am of opinion that the union of physical design and mechanical struc ture in this instrument render it what has long been the desideratum of practical surgeons in Europe and A.

From the N. York Com. Adv. AMERICAN SUNDAY SCHOOL UNION. The third anniversary of this initution was celebrated on Tuesday he 22nd ult. in the Rev. Dr. Wilon's Church, in Philadelphia. A friend of ours, who was present, has communicated the following:—

At the appointed hour (4 o'clock)

he church was crowded with a highly respectable audience. In the pul-pit, I observed the Rev. Dr. Green, of Philadelphia; Dr. Hillyer, of Ornge, New Jersey; the Rev. Ezra tiles Ely, of Philadelphia; and the Lev. Mr. Doughty, of the M. E. Church. On the platform erected or the occasion, were the officers and managers, and the gentlemen seected to address the meeting. In the front gallery were about two hundred females, selected from the several Sunday Schools, who sung an ode and hymn written by Mr. W 3. Tappan. In the rear of the young ladies, a number of gentlemen were standing, who took the base and inter parts of the tunes; and I orar barronitted to remark, that a construction of the constructio as concord of sweet sounds, I ever stened to. The exercises commenrace, by the Rev. Dr. Hillyer, after thich the following ode was sung:
